Sir / Madam;

I simply wish to voice my opinion with regard to the Microsoft anti-trust suit. Clearly Microsoft have already been found guilty. The only thing that remains is restitution, and divergence from previous business tactics.

Allowing Microsoft to flood the educational markets with free rein is clearly a step in the wrong direction. Judgments should be in the form of penalty not reward. This must include the assurance that no further anti-trust activity can continue.

Regards;

-----
